

General Cargo

For the second year in a row, Maryland's Port of Baltimore has exceeded seven million tons of general cargo.

General cargo — containers, RO/RO, automobiles, forest products, etc. — makes up approximately 20 percent of the Port's total activity and is the majority of cargo at the Maryland Port Administration's public terminals. Bulk cargo, handled by Baltimore's private terminals, comprises the balance — approximately 80 percent.

A new 100,000-square-foot transition shed is open at South Locust Point Marine Terminal for paper products and construction has begun on a 300,000-square-foot storage shed that will enable the Port to continue as a major hub for high quality imported paper. For the third year in a row, Maryland's Port topped one million tons in forest products.
